FRITZ HANSEN

PK61™ & PK61A™

PRODUCT FACT SHEET

PK61™ & PK61A™

The coffee table PK61™ is almost as elementary and minimalist as it gets from the hand of Poul Kjærholm. Despite the extreme distillation of the structure into a set of identical elements, the square and aesthetic design has the power of a manifesto and shows Kjærholm's development from industrial designer to furniture architect. The PK61A™ is an enlarged version of Poul Kjærholm's PK61™ coffee table.

DESIGNER / YEAR OF DESIGN
Poul Kjærholm, 1956

ABOUT THE DESIGNER
Poul Kjærholm was a trained cabinet maker and continued his studies at the Danish School of Arts and Crafts in Copenhagen. He had a particular interest in different construction materials, especially steel, which he considered a natural material with the same artistic fineness as other natural materials. Poul Kjærholm was first employed at Fritz Hansen for about a year, where he designed a number of noteworthy chair prototypes. In 1955, Poul Kjærholm initiated his collaboration with manufacturer Ejvind Kold Christensen, which lasted until Kjærholm's death in 1980. In 1982, Fritz Hansen took over the manufacture and sales of "The Kjærholm Collection", which was developed over the period 1951 to 1967.

MATERIAL
Tabletop: The PK61™ coffee table comes with a tabletop in 4 different materials: Slate, marble, granite and glass. The PK61A™ coffee table comes with a tabletop in 3 different materials: Marble, granite and glass. The marble comes in two variants: as a rolled or honed marble.

Base: The base for both tables is made of satin brushed stainless steel. The four base elements are joined with machine screws that lend the table part of its unique look. The removable tabletop demonstrates Kjærholm's recurring principle of using gravity to keep the elements in place.
