SUPERELLIPSE™
Product Fact Sheet

SUPERELLIPSE™

The Superellipse™ originates from a geometric curve developed by Danish mathematician Piet Hein while working on the layout of Sergels Torg in Stockholm. The shape offered a solution that balanced the clarity of a rectangle with the flow of a circle. In collaboration with Arne Jacobsen and Bruno Mathsson, Hein's geometry was translated into a table series suited to everyday use. The result is a table that combines spatial efficiency with a softer visual outline. The shape accommodates many seating positions without a defined head of the table, supporting both formal and informal gatherings.

DESIGNER / YEAR OF DESIGN

Piet Hein/Bruno Mathsson, 1968

ABOUT THE DESIGNER

Piet Hein (1905-1996)

A rational idealist, Piet Hein was neither an architect nor a furniture designer, rather he was a philosopher, poet and mathematician. He created the super-ellipse as a new oval shape for the creation of Sergels Torg in Stockholm. In cooperation with the Swedish designer Bruno Mathsson he later used the shape to make the Superellipse™ table series, which Fritz Hansen put into production in 1968.

Bruno Mathsson (1907-1988)

Bruno Mathsson was an internationally renowned Swedish designer and architect. An advocate of an idiom characterized by simplicity, beauty and elegance, he used the same principles also in the furniture he designed. Mathsson's furniture was innovative in both technology and design, and his production methods involved bending of laminated wood.

MODELS

The Superellipse™ series come in various sizes. Please find model overview on [page 4](#).
